HOW BAD ARE ULTRAPROCESSED FOODS, REALLY?

IN THE MID-1990S, CARLOS MONTEIRO, A NUTRITIONAL EPIDEMIOLOGIST IN BRAZIL, NOTICED SOMETHING ALARMING: OBESITY RATES AMONG CHILDREN IN HIS COUNTRY WERE RISING RAPIDLY.

TO UNDERSTAND WHY, HE AND HIS COLLEAGUES AT THE UNIVERSITY OF SÃO PAULO SCRUTINIZED DATA ON THE FOOD BUYING PATTERNS OF BRAZILIAN HOUSEHOLDS TO SEE IF THEY HAD CHANGED IN RECENT YEARS. THE RESEARCHERS FOUND THAT PEOPLE WERE PURCHASING LESS SUGAR, SALT, COOKING OILS AND STAPLES LIKE RICE AND BEANS, AND MORE PROCESSED FOODS LIKE SODAS, SAUSAGES, INSTANT NOODLES, PACKAGED BREADS AND COOKIES.

TO DESCRIBE THAT SECOND CATEGORY OF FOOD, DR. MONTEIRO SAID, THE TEAM INTRODUCED A NEW TERM INTO THE SCIENTIFIC LITERATURE – ULTRAPROCESSED FOODS, OR UPFS – AND DEFINED IT.

THEY WOULD LATER LINK UPFS TO WEIGHT GAIN IN CHILDREN AND ADULTS IN BRAZIL.

SINCE THEN, SCIENTISTS HAVE FOUND ASSOCIATIONS BETWEEN UPFS AND A RANGE OF HEALTH CONDITIONS, INCLUDING HEART DISEASE, TYPE 2 DIABETES, OBESITY, GASTROINTESTINAL DISEASES AND DEPRESSION, AS WELL AS EARLIER DEATH.

LEIA O TEXTO PARA RESPONDER ÀS QUESTÕES DE 17 A 19

THAT'S CONCERNING, EXPERTS SAY, SINCE ULTRAPROCESSED FOODS HAVE BECOME A MAJOR PART OF PEOPLE'S DIETS WORLDWIDE. THEY ACCOUNT FOR 67 PERCENT OF THE CALORIES CONSUMED BY CHILDREN AND TEENAGERS IN THE UNITED STATES, FOR EXAMPLE.

MOST RESEARCH LINKING UPFS TO POOR HEALTH IS BASED ON OBSERVATIONAL STUDIES, IN WHICH RESEARCHERS ASK PEOPLE ABOUT THEIR DIETS AND THEN TRACK THEIR HEALTH OVER MANY YEARS. IN A LARGE REVIEW OF STUDIES THAT WAS PUBLISHED IN 2024, SCIENTISTS REPORTED THAT CONSUMING UPFS WAS ASSOCIATED WITH 32 HEALTH PROBLEMS, WITH THE MOST CONVINCING EVIDENCE FOR HEART DISEASE-RELATED DEATHS, TYPE 2 DIABETES AND COMMON MENTAL HEALTH ISSUES SUCH AS ANXIETY AND DEPRESSION.

SUCH STUDIES ARE VALUABLE, BECAUSE THEY CAN LOOK AT LARGE GROUPS OF PEOPLE – THE 2024 REVIEW INCLUDED RESULTS FROM NEARLY 10 MILLION – OVER THE MANY YEARS IT CAN TAKE FOR CHRONIC HEALTH CONDITIONS TO DEVELOP, SAID JOSIEMER MATTEI, AN ASSOCIATE PROFESSOR OF NUTRITION AT THE HARVARD T. H. CHAN SCHOOL OF PUBLIC HEALTH. SHE ADDED THAT THE CONSISTENCY OF THE LINK BETWEEN UPFS AND HEALTH ISSUES INCREASED HER CONFIDENCE THAT THERE WAS A REAL PROBLEM WITH THE FOODS.

HOWEVER, THE OBSERVATIONAL STUDIES ALSO HAVE LIMITATIONS, SAID LAUREN O'CONNOR, A NUTRITION SCIENTIST AND PUBLIC HEALTH RESEARCHER WHO FORMERLY WORKED AT THE DEPARTMENT OF AGRICULTURE AND THE NATIONAL INSTITUTES OF HEALTH. IT'S TRUE THAT THERE IS A CORRELATION BETWEEN THESE FOODS AND CHRONIC DISEASES, SHE SAID, BUT THAT DOESN'T MEAN THAT UPFS DIRECTLY CAUSE POOR HEALTH.

THE NEW YORK TIMES. MAY 6, 2024. ADAPTED.

QUESTÃO 17

DE ACORDO COM O TEXTO, OS PESQUISADORES DA UNIVERSIDADE DE SÃO PAULO DESCOBRIRAM QUE

a) OS ALIMENTOS ULTRAPROCESSADOS FAZEM PARTE DA DIETA DA MAIORIA DAS PESSOAS EM TODO O MUNDO.

b) NÃO É POSSÍVEL RELACIONAR O CONSUMO DE ALIMENTOS ULTRAPROCESSADOS A PROBLEMAS DE SAÚDE.

c) OS BRASILEIROS ESTAVAM COMPRANDO MENOS ITENS PARA COZINHAR E MAIS ALIMENTOS PRONTOS E ULTRAPROCESSADOS.

d) OS ALIMENTOS ULTRAPROCESSADOS REPRESENTAM 67% DAS CALORIAS CONSUMIDAS POR CRIANÇAS E ADOLESCENTES.

e) OS HÁBITOS ALIMENTARES DOS BRASILEIROS MUDARAM POUCO AO LONGO DOS ANOS.

QUESTÃO 18

NO ÚLTIMO PARÁGRAFO, A PALAVRA “HOWEVER” PODERIA SER SUBSTITUÍDA, SEM PREJUÍZO DE SENTIDO, POR

a) “OTHERWISE”.

b) “THUS”.

c) “THEREFORE”.

d) “IN ADDITION TO IT”.

e) “BUT”.

QUESTÃO 19

SEGUNDO O TEXTO, O CONSUMO DE ALIMENTOS ULTRAPROCESSADOS

a) TEM DIMINUÍDO COM O AUMENTO DA BUSCA POR DIETAS MAIS SAUDÁVEIS E ALIMENTOS NATURAIS.

b) PODE DESENCADEAR PROBLEMAS DE SAÚDE MENTAL, COMO ANSIEDADE E DEPRESSÃO.

c) TEM RELAÇÃO COM OS QUASE 10 MILHÕES DE PESSOAS QUE DESENVOLVERAM DOENÇAS CRÔNICAS.

d) AINDA PRECISA SER ANALISADO POR ORGANIZAÇÕES INTERNACIONAIS.

e) EXPLICA O CRESCIMENTO DA TAXA DE OBESIDADE ENTRE CRIANÇAS E ADOLESCENTES NOS ESTADOS UNIDOS.
